

Introduction

Ledger Nano S is a cryptocurrency hardware wallet which works with several cryptocurrencies, including DasCoin, and which can be used with the DasWallet platform. You may use Ledger Nano S to safely store your private keys, as well as to electronically sign transactions of DasCoin. Support for DasWallet can be reached on support@daswallet.com or the official Dascoin Community Telegram group available on [@DasCoinOfficialEN_Chat](#)

Before you start

In order to successfully use the Ledger Nano S device with your DasWallet account, please make sure the following is in place:

1. You have successfully created your DasWallet account at:
<https://daswallet.com/register-user>
2. You have successfully completed the KYC process (visible as "Verified" in the upper right corner of your DasWallet profile when done)
3. You have made sure the latest firmware version of Ledger Nano S is installed

How to install The Validator app

1. Download and install the latest version of [Ledger Live](#)
2. Open the Manager in Ledger Live
3. Connect your Ledger Nano S and unlock it by entering the PIN code and confirming the action
4. Find The Validator App
5. Click on the Install button next to the app
6. If asked, allow Ledger Manager on your device
 - On your screen, you will see the message "Installing application..."
 - Your device will display "Processing..."
 - The installation is completed and you have the app on your device

How to access DasWallet and link it to your Ledger Nano S

1. Go to <https://daswallet.com/login> using the Google Chrome browser
2. Click on the Login button and enter your credentials
2. Make sure you are KYC verified
3. Create HotWallet
 - Choose the option HotWallet from the menu in the upper left corner of the screen
 - Click on Create HotWallet button
 - Confirm the action on your Ledger Nano S
 - HotWallet is created
4. If required, unlock Vault manually
 - Choose the " Vault " option from the menu in the upper left corner of the screen
 - Click on "Unlock Vault Account"
 - Click the "Add Key" button
 - Click the "Unlock" button
 - Confirm the Vault unlocking on your Ledger Nano S (one of the following messages will appear: Confirm transaction, Operation Tether Account, Vault ID, Wallet ID)
 - The Vault is unlocked

Where to view your account balance

1. Go to <https://daswallet.com/login> using the Google Chrome browser
2. Click on the Login button and enter your credentials
3. Go to HotWallet. There you can see balances of all the assets within your DasWallet account

How to receive DasCoin on your DasWallet

1. Go to HotWallet
2. Under DasCoin Balance you will see your DasCoin address
3. Copy the address by pressing the Copy sign next to it
4. Provide the sender with your DasCoin address
5. DasCoin can be sent to you using your DasCoin address

How to send DasCoins from your DasWallet

1. Go to HotWallet and click on "Send DASC"
2. Enter the DasCoin address of the account you wish to send funds to, and click "Continue"
3. Enter the amount of DasCoin (if needed, make sure to enter the Memo)
4. Press Continue, and a new window will appear (please review your request before submitting)
5. Make sure that the information on your Ledger Nano S display is correct before you confirm the transfer
6. Confirm the transaction on your Ledger Nano S and on your DasWallet
